- MONGO DB ( MONGOOOSE )
- POSTMAN

## Soft Skills

- Teamwork
- Responsibility
- Time management
- Adaptability
- Good communication

## Languages

- Ukrainian - Native
- English - Upper-intermediate

# Vilhota Alina

## Fullstack Developer

### Summary

I am a junior front-end developer looking for a job that will allow me to develop and acquire new knowledge in the IT industry.

I have always been curious about the processes that take place "behind the screen", which are unavailable to the average user. I enjoy creating websites and apps that make people's lives a lot easier. Learning, development and results orientation are my priorities in both life and work. Being part of the team also plays a significant role from my point of view because teamwork is the key to success. I always try to be open to new challenges and tasks and perform them with a high standard.

### Project experience

#### Web-studio - website, [Link](#)

(HTML, CSS, SASS, Java Script, FIGMA)

##### First personal project

A website with a responsive layout and CSS animation. HTML markup and design of the elements for the form. Build a project on GitHub, check for build errors and live page performance.

#### MIMINO - website, [Link](#)

(HTML, SASS, Java Script, FIGMA, Vite)

A website for the MIMINO restaurant-hotel complex

##### Role: Creating a Hero section on every page of the site

Create an adaptive layout, connecting and optimizing photos, setting a hyperlink to the address of the Mimino restaurant-hotel complex on the map.

#### Search images - application for searching photos for any taste, [Link](#)

(HTML, CSS, JavaScript, Parcel, Axios, Pixabay, Notiflix, SimpleLightBox)

##### Personal project

I am creating requests for the server, rendering the page based on the response from the server, and checking the entered data in the search form. Setting search result notifications. View photos in gallery mode (enlarged photo format)

#### Movies - application for convenient search and viewing of movies, [Link](#)

##### Personal project

(HTML, CSS, React(components), Styled Components, Webpack, react-loader-spinner, react-toastify, axios, react-icons, themoviedb.org API.)

The individual project is a website that allows a convenient search of any film and the option to view the film cast with commenting sections under each film. I used routing (react-router-dom) for the website creation, allowing the user to move between the site's pages conveniently.

### Work Experience

#### Senior salesman

Chain of jewellery stores "Golden Country"| 2020 - 2022

- communication with clients
- sale of jewellery
- working with a cash register
- carrying out an inventory of goods
- receiving and sending jewellery
- closing cashier shift

Achievements: during my work, our team and I raised the rating of the store to the top

3 jewellery stores of the year and received the award of the best employees

### Education

#### IT School GoIT(Kyiv)

Fullstack Developer

2022-2023

Uzhhorod National University

Faculty of Tourism and International Communications

2017-2021
